SUPPLEMENT TO  
REPORT NO.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE  
OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT OF  
U. S. C. 51 AND 52, AS AMENDED. ITS TRANSMISSION OR THE DISCLOSURE  
OF ITS CONTENTS TO AN UNAUTHORIZED PERSON IS PRO-  
HIBITED BY LAW. DISSEMINATION OF THIS FILE IS FORBIDDEN.

THIS IS UNEVALUATED INFORMATION

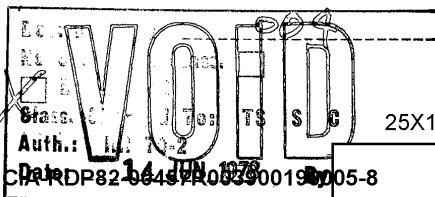

- 25X1 1. Each of the People's Republics in Yugoslavia has an Academy of Science  
25X1 patterned according to the Soviet system. The academies, as such, are  
totally different from those in the West.
2. The six academies are all part of one central organization, the National  
Academy of Science in Belgrade, whose president is Dr. Sinisa Stankovic.  
Although the Academy of Science has all the markings of an independent  
organization, it is actually the creation of the Committee for Science  
and Culture.
3. In the Academy of Science, there is a Commission of Affairs which is con-  
cerned purely with administrative matters. The director of this commission  
is always appointed on the basis of his political ability, and he is under  
the director of the academy. The commission serves in a liaison capacity  
between the Academy of Science and the Committee for Science and Culture  
in the interest of the Serbian Republic, whose minister is Milka Minic.
4. The president of the Serbian Academy of Science is Dr. Aleksandar Belic,  
and the secretary is Professor Miskovic. Twenty-four Institutes of  
Science have been organized within the framework of the Serbian Academy  
of Science. Each institute has a director, assistant director, secretary  
and assistants in science.
5. All of the institutes, except one, are presently located in the Technical  
School in Belgrade. Plans call for the construction of individual  
buildings to house each separate institute. There is a special and  
separate establishment, housing the Physics Institute, which is well  
camouflaged in the village of Vinca, 17 kilometers from Belgrade, on the  
Danube River.\*
6. Each Institute of Science has its own laboratory, with additional branch  
laboratories in various industrial centers. The institutes perform tasks  
which are assigned to them each year by the National Planning Commission.  
First consideration is given to current problems confronting industry  
in order to insure the successful completion of the Five Year Plan.
7. Some of the institutes which make up the Serbian Academy of Science are:

d. Biological Institute

Dr. Sinisa Stankovic

e. Telecommunications Institute

Prof. Aleksandar Damjanovic

f. Hydro-technical Institute

Eng. Bogic Knezevic

g. Electro-technical Institute

Prof. Miljenic

h. Mathematics Institute

Prof. Bilimovic

8. The Yugoslav Government has placed large sums of money at the disposal of the Academies of Science. In September 1949, the Serbian Republic gave twenty million dinars to the Serbian Academy of Science for the purchase of scientific instruments. One commission, composed only of men who have wives and children in Yugoslavia, has been sent abroad, presumably to purchase instruments.

9. The National Planning Commission has a National Commission for Research, which includes on its staff: Eng. Bogdan Lakovic, Eng. Alfred Jaeger, Eng. Miodrag Novakovic, Eng. Nada Sustercic, Eng. Milan Vljakovic and Eng. Stjepan Han, recently in United States regarding negotiations for loans at International Bank.
